

Thursday, February 5, 2026 –

07:30-09:00 **Breakfast**

09:00-09:30 **The Return of Symmetry-Driven Compilation Languages**  
by *Alexis de Colnet*

Daniel Gnad

09:30-10:00 **Quantum Circuit Analysis**  
by *Alfons Laarman*

10:00-10:45 **Tea**

10:45-11:30 **Breakout / Open Problems Session**  
by —*Participants*—

Groups

11:30-13:30 **Lunch**

13:30-14:00 **A Compositional Atlas for Algebraic Circuits**  
by *YooJung Choi*

Max Bannach

13:30-14:00 **Extension Complexity and the Convex Hull of Boolean Functions**  
by *Florent Capelli*

14:00-15:00 **Breakout / Open Problems Session**  
by —*Participants*—

Groups

15:00-16:00 **Tea**

16:00-18:00 **Breakout Session**  
by —*Participants*—

Groups

18:00-20:00 **Dinner**

Friday, February 6, 2026 –

07:30-09:00 **Breakfast**

09:00-09:30 **Outcomes and Follow Ups**  
by — *all Participants* —

Johannes Fichte

09:30-10:00 **The Model Counting Competition**  
by *Johannes Fichte*

10:00-10:45 **Tea**

10:45-11:30 **Final Discussions**  
by — *all Participants* —

Chair (tbd)

11:30-11:45 **Closing**  
by *Kenji Hashimoto, Johannes Fichte*

Chair (tbd)

11:30-13:30 **Lunch**

---

Past Days:

---

Monday, February 2, 2026

07:30-09:00 **Breakfast**

09:00-09:15 **Welcome by the Organizers (Room 208)**  
by *Kenji Hashimoto, Johannes Fichte*

Johannes Fichte

09:15-10:15 **Introduction by the Participants**  
by —*The Participants*—

(2 minutes each)

10:15-10:45 **Tea**

10:45-11:15 **Short Tutorial: Basics in Counting Complexity**  
by *Heribert Vollmer*

Arnaud Durand

11:30-13:30 **Lunch**

13:30-14:30 **Tutorial: Practical Knowledge Compilation**  
by *Jean-Marie Lagniez*

Johannes Fichte

14:30-15:00 **Model Counting at ESA (European Space Agency)**  
by *Max Bannach*

15:00-16:00 **Tea**

16:00-16:30 **Weighted Model Counting Problems in the Context of LLMs**  
by *Guy Van den Broeck*

Arne Meier

16:30-17:00 **KLay: Accelerating Arithmetic Circuits for Neurosymbolic AI**  
by *Pedro Zuidberg Dos Martires*

17:00-17:45 **Open Problem Session**  
— Suggesting Open Problems —

Florent Capelli

18:00-20:00 **Dinner**

Tuesday, February 3, 2026 –

|             |                                                                                                                                    |                    |
|-------------|------------------------------------------------------------------------------------------------------------------------------------|--------------------|
| 07:30-09:00 | <b>Breakfast</b>                                                                                                                   |                    |
| 09:00-10:00 | <b>Tutorial: Proof Complexity &amp; Model Counting</b><br>by <i>Olaf Beyersdorff</i>                                               | Alexis de Colnet   |
| 10:00-10:45 | <b>Tea</b>                                                                                                                         |                    |
| 10:30-11:00 | <b>Proof Systems That Tightly Characterise Model Counting Algorithms</b><br>by <i>Tim Hoffmann</i>                                 |                    |
| 11:00-11:30 | <b>Semantic Vtrees for SDD Compilation</b><br>by <i>Stefan Szeider</i>                                                             |                    |
| 11:30-13:30 | <b>Lunch</b>                                                                                                                       |                    |
| 13:30-14:15 | <b>Short Tutorial: Approximate Model Counting</b><br>by <i>Kuldeep Meel</i>                                                        | Jean-Marie Lagniez |
| 14:15-14:45 | <b>Message Passing Algorithms for Computation of Error in Probabilistic and Approximate Circuits</b><br>by <i>Vinita Vasudevan</i> |                    |
| 14:45-15:00 | <b>Preparing Groups for the Breakout Session</b>                                                                                   | Groups             |
| 15:00-16:00 | <b>Tea</b>                                                                                                                         |                    |
| 16:00-16:30 | <b>Counting and Planning</b><br>by <i>Daniel Gnad</i>                                                                              | Stefan Szeider     |

| 17:00-18:00 | <b>Breakout / Open Problems Session</b><br>by —Participants—                                                                       | Groups             |
| 18:00-20:00 | <b>Dinner</b>                                                                                                                      |                    |

Wednesday, February 4, 2026 –

07:30-09:00 **Breakfast**09:00-09:30 **Sometimes Counting Is Not Enough: Why Model Enumeration Matters**  
by *Giuseppe Spallitta*

Olaf Beyersdorff

09:30-10:15 **Efficient Enumeration on Circuits**  
by *Heribert Vollmer*10:15-10:45 **Tea**10:45-11:30 **Parameterized Enumeration**  
by *Arne Meier*

Johannes Fichte

11:30-13:00 **Lunch**13:30-18:00 **Excursion to Kamakura (Meeting 13:20-13:25 Entrance 1F)**

Bus leaves at 13:30

— *Visiting Jomyoji and Hokokuji temple with Japanese Tea ceremony* —— *Guided Tour* —— *Joint Banquet Dinner in Kamakura* —
