

Tuesday, February 3, 2026 –

07:30-09:00	Breakfast	
09:00-10:00	Tutorial: Proof Complexity & Model Counting by <i>Olaf Beyersdorff</i>	Alexis de Colnet
10:00-10:45	Tea	
10:30-11:00	Proof Systems That Tightly Characterise Model Counting Algorithms by <i>Tim Hoffmann</i>	
11:00-11:30	Semantic Vtrees for SDD Compilation by <i>Stefan Szeider</i>	
11:30-13:30	Lunch	
13:30-14:15	Short Tutorial: Approximate Model Counting by <i>Kuldeep Meel</i>	Jean-Marie Lagniez
14:15-14:45	Message Passing Algorithms for Computation of Error in Probabilistic and Approximate Circuits by <i>Vinita Vasudevan</i>	
14:45-15:00	Preparing Groups for the Breakout Session	Groups
15:00-16:00	Tea	
16:00-16:30	Counting and Planning by <i>Daniel Gnad</i>	Stefan Szeider
16:30-17:00	Counting Beyond #SAT: Quantification in SMT by <i>Arijit Shaw</i>	
17:00-18:00	Breakout / Open Problems Session by —Participants—	Groups
18:00-20:00	Dinner	

Wednesday, February 4, 2026 –

07:30-09:00 **Breakfast**

09:00-09:30 **Sometimes Counting Is Not Enough: Why Model Enumeration Matters**
by *Giuseppe Spallitta*

Olaf Beyersdorff

09:30-10:15 **Efficient Enumeration on Circuits**
by *Heribert Vollmer*

10:15-10:45 **Tea**

10:45-11:30 **Parameterized Enumeration**
by *Arne Meier*

Johannes Fichte

11:30-11:45 **Group Photo**
— *All Participants* —

11:45-13:00 **Lunch**

13:30-18:00 **Excursion to Kamakura (bus at 13:30 Entrance 1F)**
— *Visiting Jomyoji and Hokokuji temple with Japanese Tea ceremony* —
— *Guided Tour* —
— *Joint Banquet Dinner in Kamakura* —

Thursday, February 5, 2026 –

07:30-09:00	Breakfast	
09:00-09:30	The Return of Symmetry-Driven Compilation Languages by <i>Alexis de Colnet</i>	Daniel Gnad
09:30-10:00	Quantum Circuit Analysis	Max Bannach
10:00-10:45	Tea	
10:45-11:30	Breakout / Open Problems Session by —Participants—	Groups
11:30-13:30	Lunch	
13:30-14:00	A Compositional Atlas for Algebraic Circuits by <i>YooJung Choi</i>	Max Bannach
13:30-14:00	Extension Complexity and the Convex Hull of Boolean Functions by <i>Florent Capelli</i>	Max Bannach
14:00-15:00	Breakout / Open Problems Session (?) by —Participants—	Groups
15:00-16:00	Tea	
16:00-18:00	Breakout Session by —Participants—	Groups
18:00-20:00	Dinner	

Friday, February 6, 2026 –

07:30-09:00	Breakfast	
09:00-09:30	Outcomes and Follow Ups by — <i>all Participants</i> —	Johannes Fichte
09:30-10:00	The Model Counting Competition by <i>Johannes Fichte</i>	
10:00-10:45	Tea	
10:45-11:30	Final Discussions by — <i>all Participants</i> —	Chair (tbd)
11:30-11:45	Closing by <i>Kenji Hashimoto, Johannes Fichte</i>	Chair (tbd)
11:30-13:30	Lunch	

Past Days:

Monday, February 2, 2026

07:30-09:00 **Breakfast**

09:00-09:15 **Welcome by the Organizers (Room 208)**
by *Kenji Hashimoto, Johannes Fichte*

Johannes Fichte

09:15-10:15 **Introduction by the Participants**
by —*The Participants*—

(2 minutes each)

10:15-10:45 **Tea**

10:45-11:15 **Short Tutorial: Basics in Counting Complexity**
by *Heribert Vollmer*

Arnaud Durand

11:30-13:30 **Lunch**

13:30-14:30 **Tutorial: Practical Knowledge Compilation**
by *Jean-Marie Lagniez*

Johannes Fichte

14:30-15:00 **Model Counting at ESA (European Space Agency)**
by *Max Bannach*

15:00-16:00 **Tea**

16:00-16:30 **Weighted Model Counting Problems in the Context of LLMs**
by *Guy Van den Broeck*

Arne Meier

16:30-17:00 **KLay: Accelerating Arithmetic Circuits for Neurosymbolic AI**
by *Pedro Zuidberg Dos Martires*

17:00-17:45 **Open Problem Session**
— Suggesting Open Problems —

Florent Capelli

18:00-20:00 **Dinner**
